- **stages** of the process,

# WHAT IS QUALITATIVE RESEARCH PROCESS CURATION?

Quality research process curation is the process of **identifying, systematizing, managing** and **registering** on the

-  archers working in the process,
- **stages** of the process,
- **content** produced along the stages of a research process

# WHAT IS QUALITATIVE RESEARCH PROCESS CURATION?

Quality research process curation is the process of **identifying, systematizing, managing** and **registering** on the

- **researchers** working in the process,
- **stages** of the process,
- **content** produced along the stages of a research process

**itions** in which the **stages** are performed and  
the **content** are produced.

# MOTIVATION FOR A GT PROCESS CURATION MODEL

- Manage **research process complexity**
- Make **process decisions traceable**
- Improve **reuse**, **reproducibility** and **transparency**

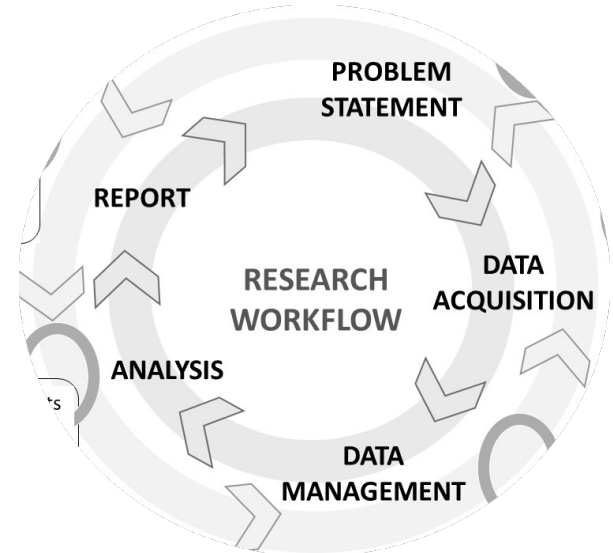

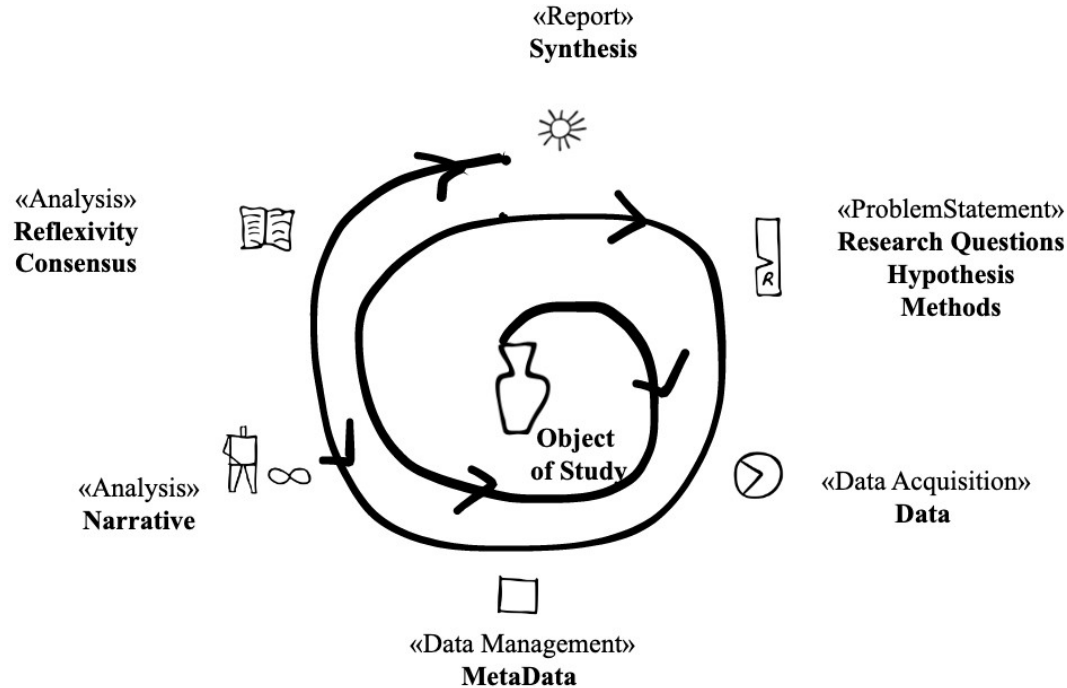

# APPROACH: CONCEPTUAL MODEL

Create a **conceptual model** that represents a curated  
Grounded Theory **process**

# QUALITATIVE RESEARCH PROCESS FIRST APPROACH (NON LINEAL)

Adorjan, A., Vargas-Solar, G., & Motz, R. (2023, April ). Towards a researcher-in-the-loop driven curation approach for quantitative and qualitative research methods. In 2023 27th European Conference on Advances in Databases and Information Systems (ABDIS) .

# AGENDA

- Context: Ground Theory and Curation
- Problem statement: Curating GT Process Principle
- **Curation Model**
- Conclusions and Future Work

# ARTEFACT

An **artefact** is an abstract representation of **context**, **data**, **role** or **knowledge** that is generated, transformed, or used throughout the Grounded Theory research lifecycle.

Simple Example :  
> **Raw Graffiti Photo**

# ARTEFACT PROPERTY

An **artefact** maintain the **traceability** of content, researchers, and stages by collecting, preserving, and registering associated metadata.

**Example:**

> **Traceability** of the **consensus** achieved among researchers through successive rounds of coding.

# CURATION MODEL: RESEARCHERS AND CONSENSUS

Iterative process guided by researchers **decision making**  
**consensus** patterns

**Coding**

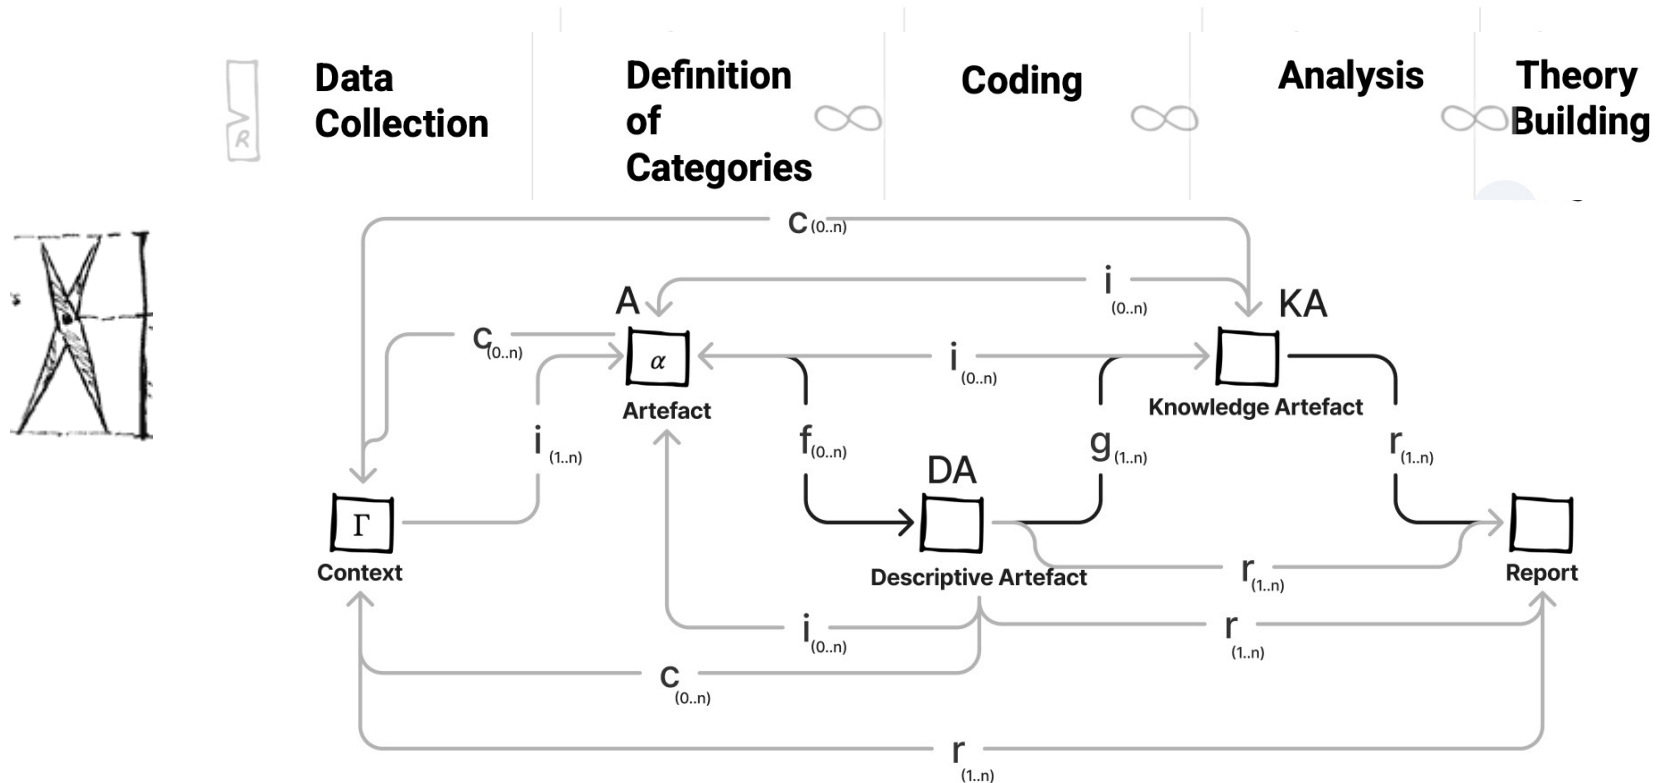

**Analysis**

**Theory  
Building**

# CURATION MODEL: CONTENT

Qualitative Research Process Workflow

# EXPLORING CURATED PROCESSES

- Transparency of the inductive process of the GT method
- Systematization and formalization of the process
- Improve reuse, reproducibility, and transparency with an inductive curational model

**Types of responses** that a **model** could be able to explain:

- How do artifact coding criteria evolve over time?
- What types of consensus are established among researchers?
- Which stages are the most complex in developing a theory?
- What types of decision-making were recorded by researchers as consensus, and how did they influence theory construction?
- Which stages of the traditional research process were not considered?

# AGENDA

- Context: Ground Theory and Curation
- Problem statement: Curating GT Process Principle
- **Curation Model**
- **Conclusions and Future Work**

# PROGRESS STATUS AND FUTURE WORK

- **PROGRESS Status:**

- **Abstract modeling** of a qualitative methodology, such as Grounded Theory
- Application through **real-world** existing research process. 
- Representation of the curation model through specific instances of MENTOR Use Cases

- **FUTURE Work:**

- **Researcher-in-the-Qualitative-Loop** model

# Thanks !!
